

Front line treatment for Follicular lymphoma

New diagnosis follicular lymphoma

*Consider eligibility for clinical trials

*Consider palliative RT for patients with symptomatic disease who are unsuitable for treatment with systemic therapy

• Baseline PET/CT

- GELF criteria:
- Any nodal or extranodal tumour mass $\geq 7\text{cm}$
 - 3 nodal sites, each $> 3\text{cm}$
 - Presence of B symptoms
 - Splenomegaly
 - Compression/compromise of vital organs
 - Pleural or peritoneal serous effusion
 - Leukaemic phase disease ($> 5.0 \times 10^9/\text{L}$)
 - Cytopenias (WCC $< 1.0 \times 10^9/\text{L}$ and or platelets $< 100 \times 10^9/\text{L}$)

- FLIPI:
- Age > 60 yrs
 - > 4 nodal sites
 - LDH elevated
 - Haemoglobin $< 120\text{g/L}$
 - Stage III/IV
